

# USW Music Therapy and Autism Conference

Saturday 16<sup>th</sup> November 2019, 9.30am – 4.15pm  
University of South Wales, Newport City Campus, NP20 2BP

We invite you to join us for an informative day of paper presentations from experienced colleagues, and poster presentations from USW students and recent graduates to explore a range of perspectives on how we work with autistic people in music therapy.

Speakers will draw from resonant fields of music psychology, critical disability studies and transdisciplinary working to provide a range of lenses for reflecting upon and understanding practice. The day will be chaired and the discussions led by **Elizabeth Coombes** (Music Therapist, Course Leader, PhD Researcher). The programme includes:

- **Dr. Neta Spiro** (Research Fellow, Royal College of Music and Honorary Research Fellow, Imperial College London): *Scaling up and scaling down: Perspectives on outcome measurement in research with children with autism.*
